Numer katalogowy	PRO1575-20
Kod producenta	PRO1575-20

Opis produktu

From the moment rumors surfaced that Chevy® was reinventing the legendary Corvette™ into a mid-engine supercar, all of us at [PROTOform](#) were waiting with bated breath to see what our future GT racing body would look like. PROTOform is now proud to bring one of the most anticipated cars Chevrolet® has ever built to 1:12 scale with their release of the Corvette™ C8 body for [1:12 pan cars](#).

This officially licensed body is perfectly suited for GT12 class racing. All the exceptional details of its 1:1 counterpart including aggressive cab forward design, striking front splitter, and sculpted side doors and vents are captured using the latest in 3D CAD and 5-axis milling technology. The extensive decal sheet lets you deck out your C8 with Corvette™ branded windshield headers, number plates, "Jake" skulls and USA flags.

The C8 fits any 1:12 pan car or GT12 specific chassis and is formed from high-quality lightweight polycarbonate with paint-then-peel overspray film. It also includes an add-on rear wing with multiple trim heights for aero adjustability, wing mounting hardware and window masks.
