## HUDY 109370 Alu Set-Up Wheel for 1/10 Rubber Tires (4)

Cena brutto	<b>251,87 zł</b>
Cena netto	<b>204,75 zł</b>
Dostępność	<b>Aktualnie niedostępny</b>
Numer katalogowy	<b>109370</b>
Kod producenta	<b>109370</b>

### Opis produktu

**CNC-machined premium-quality aluminum set-up wheels for electric and nitro 1/10 touring cars allows for perfect, precise and repeatable set-up adjustment and tweak correction. Eliminates the errors inherent in using standard rubber tires or foam tires. Precision-machined to exacting tolerances, each alu set-up wheel in a set is perfectly matched.**

**When checking tweak on a rubber-tired touring car, using standard rubber tires typically gives non-precise and non-repeatable measurements. Rubber tires are never perfectly rounded, so when checking tweak one tire can lift earlier than another but this does not always indicate a tweaked car. Tire roundness and insert weight is different from one tire to the next.**

**When checking tweak on a foam-tired touring car, the differences between tires are even greater than with rubber tires. Each foam tire has a different diameter after each run due to tire wear, making it impossible to check for tweak because the tires can give very misleading results. In this case the alu set-up wheels are the best tool for checking tweak.**
