Mighty Gripper V3 Red additive (For Oily Track Surface)

Cena brutto	112,05 zł
Cena netto	91,08 zł
Dostępność	Aktualnie niedostępny
Numer katalogowy	V3-Red
Kod producenta	V3-Red

Opis produktu

NASA RC Fuel and Chemical introduces the new Mighty Gripper V3 Red. Based on the popular Mighty Gripper V2 Red, NASA has finally created a new V3 Red formula that surpasses the V2 Red performance.

The Mighty Gripper V3 Red has been tested around the world including tracks with super high grip in Yatabe Japan and TITC Thailand. The Mighty Gripper V3 Yellow and V3 Blue will also continue in production as this formula is still suitable in many tracks depending on the track conditions.

Color	Properties	Grip Power	Sustainability (of each apply)	Flow	Dust Resistance	Application Time (before run)	Chemistries
Yellow	For High Grip Track: It has most flowing cornering speed in the very high grip condition.		Weakest	Standard	Highest	Low	3 - 10 min
Blue	For Tire Preparation: This has Strongest grip in all Mighty Gripper's line-up.		Strongest	Short	Low	Low	10 sec to 1 min
Red	For Oily Track Surface: This made of oily track and low traction track. Effective for Tamiya and Ride tires.		Medium Strong	Long	Standard	Standard	1 - 5 min
Black	Most Sharp Handling: Stock class special. Based on Yellow. Able to add grip for sideways more. Sharpest.		Strong	Long	High	High	3 - 5 min
White	Balance Grip and Flow: Good to use for high power class. Used of new materials. This has flow and stability together.		Strong	Longest	High	High	3 - 10 min
Orange	Balance grip and flow: Good to use for High Power Class.		Strongest at out door	Longest	Standard	Highest	1 - 3 min

	Used of new materials, This had flow and stability together.	track						condit Longe effect around Cook b warmer make additio grip.
