Milansport Carbon Reinforcement for Bodyshells

Cena brutto	15,75 zł
Cena netto	12,83 zł
Dostępność	Dostępny
Numer katalogowy	MS-BPS02
Kod producenta	MS-BPS02

Opis produktu

Carbon material used to support or reinforce bodyshells is nothing new. Many drivers started to use it in many different ways. It is a great option to prevent your body shell from unwanted deformation and body tuck.

Milansport offers a set of 3 different thickness of the Carbon rods:

0.8mm x 3pcs 100mm long

1.0mm x 3pcs 100mm long

1.2mm x 3pcs 100mm long

Example of use:

- in 1/12 scale to support the rear of the body shell in high speed and front from deformation
- in TC and FWD to stiffener the rear part of bodyshell to also prevent from body tuck
- in F1 to stiffener the front above the arms where the shell got the weakest point

TIP

It is suggested to use it with Body Fix material like Shoe Goo:

[Shoe Goo Glue - Body repair 109.4ml](#)
