### Opis produktu

Milansport Crystal Skid Plates!

This will protect the front and rear in your 1/8 buggy cars. You can use them in practice runs as it will lower a bit the ride height, but at only 2mm so still fine to have them when racing!

The Skid Plates are 3d printed parts from strong material that will survive a long time.

After few test runs with them I'm sure this will protect your chassis from wear of.

They are designed to go with the standard screws you already got in your car.

The set will include Skid Plate for front and rear. In some cars the size of front and rear is the same.
