Opis produktu

Milansport Fan Duct for Mid Motor 30x30
Designed for TC cars with Mid Motor configuration. The design keep the fan 10mm from the motor allowing the wind to cool the motor with best properties of cooling. Shape of the Fan Duct keeps the cooling on the most effective level, lowering the temp of the motor with at least 10 degrees Celsius then having only the fan mounted to the car.

Mounting the Fan Duct is by using a double side tape. You can freely move the fan duct to or from the motor. Recommended distance between fan and motor is minimum 10mm.
