Opis produktu

The new Sunpadow battery 6000 mah

With countless tests and feedback from Sunpadow best drivers around the globe, the Sunpadow R&D team constantly improved the formula and releases the **new Platin series**. The first member is the CS 6000mAh stick pack designed for competition of STOCK classes. This battery features **excellent discharge capacity** combined with lightweight design which is essential for highest RC car racing competition in STOCK classes.

By adjusting the product formula structure, adding the **latest high-tech lithium-ion battery** TT synergistic material, the battery weight is reduced by 4% compared with the Gold label 6000mAh.

The Platin series batteries feature a **significant improvement** in terms of punch and power which is gained via IR reduction of the cells. A powerful discharge performance and a more balanced frame weight distribution will help you for better performance and faster lap times at the racetrack to bring home more victories.
