## Opis produktu

X4 Graphite Chassis is suitable for asphalt tracks and low to medium traction carpet tracks.

The X4 chassis is designed to work with the X4 suspension arms, motor mount, T-brace and features holes for centering pins for the bulkheads, front shock tower, and rear body mounts.

The 2.2mm thick chassis is CNC-machined from premium-grade graphite material. This chassis is developed for all asphalt surface conditions. The narrow chassis is only 84mm wide, with a variety of chassis flex adjustments that help to generate exceptional traction and give excellent steering characteristics.
