## Opis produktu

X4 Alu Flex Chassis is suitable for most carpet tracks, and high traction asphalt tracks.

The X4 chassis is designed to work with the X4 suspension arms, motor mount, T-brace and features holes for centering pins for the bulkheads, front shock tower, and rear body mounts.

The 2.0mm thick aluminum flex chassis is CNC-machined from premium Swiss 7075 T6 aluminum, then black coated and laser engraved.

The ultra-narrow chassis is only 84mm wide and features special cut outs that provide the chassis flex characteristics suitable for a wide variety of the traction levels. The bottom of the chassis is shaped to reduce contact between the chassis and the ground while turning to improve cornering speed.
