Numer katalogowy	<b>301063</b>
Kod producenta	<b>301063</b>

### Opis produktu

Thinner 1.6mm graphite top deck is recommended for use in low- to medium-traction conditions with the alu chassis.

The redesigned top deck works with the center layshaft location in the middle of the chassis. Made from 1.6mm graphite material, the shape of the top deck has been specifically designed to achieve maximum traction and great steering characteristics at the same time.

The top deck can be mounted via connecting stand using these flex alternatives:

- 1.) Soft setting - The top deck is not connected to the stand for maximum flex to generate maximum steering but can be more difficult to drive.
- 2.) Medium setting - The top deck is connected to the stand through a ball-bearing which allows the top deck to flex side-to-side but not front-to-rear.
- 3.) Stiff setting - The top deck is connected to the stand through a fixed bushing that completely stiffens the whole car for increased stability.

Fits T4'21
