Opis produktu

CNC-machined highest-quality aluminum RIGHT & LEFT C-hub for ARS suspension. Caster pre-set at 2 degrees.

Helps to generate more traction but in the same time generates more off-power steering and cornering speed compared to standard rear suspension. Recommended for medium-traction conditions.

Machined from premium Swiss 7075 T6 aluminum and black coated.

Engraved with "2R" for easy identification. Includes two nylon bushings.

The C-hubs are available in standard caster angles (0°, 2°, 4°).
