Opis produktu

Rear anti-roll bar redesigned to work with new bulkheads and ball-bearing roll bar mounting system. The all-new anti-roll bar system is mounted to the front & rear bulkheads via bearings from outside for extra-smooth movement and for quick & easy changes and adjustment. The roll bar turns in ball-bearings for maximum precision and free movement. Anti-roll bar height is adjustable via a screw... quick & easy.

Anti-roll bar has laser-engraved stripes (corresponding to bar thickness) for easy identification.
