Cena brutto	471,33 zł
Cena netto	383,18 zł
Dostępność	Dostępny
Numer katalogowy	371117
Kod producenta	371117

Opis produktu

CNC-machined X12'21 chassis made from 2.0mm Swiss 7075 T6 aluminum. Alu flex chassis features more cut-outs better suited for low to medium grip conditions.

The chassis was redesigned to accommodate the front Tweak-Free Suspension and the rear Tweak-Free POD System. The side link mounting system was redesigned as well and is mounted directly to the chassis and the chassis features slots for adjustment of the servo mount position. The chassis and rear POD edges are beveled, for less resistance to the ground during cornering.

Chassis makes the car easier to drive, keeps more cornering speed, and helps prevent traction rolling.
