Opis produktu

Molded composite LEFT steering block for 4mm King Pin. Hard material. Marked "L" for easy identification.

Composite steering block is redesigned to work with the 4mm king pin axle, features redesigned Ackerman positions for improved steering, and is molded from a special graphite composite material for minimum friction against the kingpin.

The steering blocks use ultra-precise wheel axles CNC-machined from premium HUDY Spring Steel, that are additionally hardened and hand ground for precision fitment.

Use with matching right steering block #372214.
