Cena brutto	91,35 zł
Cena netto	74,25 zł
Dostępność	Dostępny
Numer katalogowy	373095
Kod producenta	373095

Opis produktu

Alu Chassis Pivot Holder is part of the aluminum Tweak-Free Pod Mounting System which improves traction and stability of the car and eliminates tweak issues after crashes. The Tweak-Free Pod Mounting System allows for a significantly lowered roll center, lowered center of gravity, and pivot height adjustment using different shims.

The pod mounting position choices include the standard rearward mounting position where the center pivot is located in-line with the side link pivot balls on the rear pod plate, and the forward location that places the pivot 2mm forward of the link mounting points. This adjustment has a significant effect on the cornering feel:

Forward - gives a good balance between front and rear traction, and is well suited for most conditions.

Rearward - gives the most steering, and most free rear end, especially suited for high grip carpet.

Must be used with #373096 and 373097
